

Product guidance for VEGETARIANS

About this list

This list contains Sainsbury's own brand products that are suitable for a vegetarian diet. As there is currently no legal, common definition for the word vegetarian, Sainsbury's policy is to label products suitable for vegetarians according to the Food Standard Agency's guidelines for lacto-ovo vegetarians i.e. Do not eat any meat, poultry, fish or shellfish, but they eat milk, milk products and eggs.

Our suppliers and product technologists have ensured that all products contained in this list do not contain any ingredients that are, or are made from, ingredients derived from animals that have died or have been slaughtered. The risk of these products being contaminated with animal products at any stage of the supply chain or production process has also been effectively managed. Products containing eggs and milk are regarded as part of the vegetarian diet and therefore are contained in this list.

Using the list

This list **does not** include products from the **In Store Bakery**, the **service deli**, the **hot food counters**, **fresh meat** and **fresh fish counters**, Sainsbury's **café** or the **self-service salad bar**. This is because we advise people with allergies to avoid all of the products sold in these areas due to the potential risk of cross contamination caused by the open food handling.

Within the list, the products are divided by categories e.g. Fresh meal solutions, Dairy, Biscuits etc.

These categories are then divided into sub-categories. So in **Fresh meal solutions** you will find Classic meals, Inspired to Cook, Fresh Italian meals, Fresh Indian meals etc. Following each sub-category there is a four digit number in brackets, e.g. Fresh Italian meals (0015). This is the department code that is unique to the sub-category, this code may help the Sainsbury's colleague in store find the product for you.

The *first column* of the list contains some numbers, used internally by Sainsbury's, called **SKUs**. Each product has a unique SKU number and this may help the Sainsbury's colleague in store or on the customer service desk help you identify the product you are looking for.

The *second column* contains the **barcode** that appears on pack.

The *third column* is the product description. This is the name of the product that appears on the front of pack and it also includes the weight of the product.

How to identify the exact product from the list, when you're doing your shopping:

Sainsbury's sub-brands and abbreviations used in the list:

basics. This is a wide range of Sainsbury's quality food and non-food products at surprisingly low prices, helping budget conscious shoppers lower the cost of their weekly shop. Over 200 of our basics products cost 50p or less. The basics range conforms to our high standards of quality, health and integrity which is why basics foods are free from hydrogenated fats and artificial flavour enhancers.

Taste the difference (abbreviated in the list to Ttd). This is Sainsbury's premium offering of food & drink, giving customers a wide range of high quality, fantastic tasting products. Our teams take time, care & attention to ensure we source the best ingredients & recipes from around the world, to deliver an outstanding taste experience.

be good to yourself (abbreviated in the list to bgty). This is Sainsbury's healthier option range where we have developed great tasting everyday essential products which are better for you because we have controlled the levels of fat, saturated fat, sugar and salt without compromising on taste. All products will either be less than 3% fat or reduced fat (containing at least 30% less fat than the standard equivalent product).

freefrom. This is Sainsbury's brand of products that have all been specially made without wheat or gluten and most are also made without dairy. Products are suitable for coeliacs and people with a wheat allergy. Most are also suitable for people with milk allergy or lactose intolerance.

Sainsbury's SO Organic. This is Sainsbury's range of products where we have developed an organic alternative to most mainstream products. Products are made without the use of artificial fertilisers and limited use of pesticides. Farming practices aim to encourage wildlife and promote optimum soil health. Meat and animal derived products are from farms working to the highest standards of animal welfare. All products have been certified by an organic certification body such as the Soil Association, all whom conform to the standards laid down by the UK and EU government.

Kids. This is Sainsbury's range for kids, giving healthy choices that mums trust and children enjoy. The range is nutritionally balanced and designed especially for children between 4 and 8 years of age, making it a convenient and tasty way to eat healthily. Every product meets Sainsbury's strict standards on salt, sugar and saturated fat and is taste tested and approved by children.

February 2012

How to read Sainsbury's labels

The following products are considered by Sainsbury's to be obviously suitable for vegetarians and are therefore exempt from vegetarian and/or vegan labelling:

Pre-packed fruit, vegetables and salad vegetables
Cooking oils
Eggs
Plain (not flavoured) Butter, Milk and Cream
Plain (unseasoned flours)
Salt, Pepper, Herbs, Spices and Curry Powders
Dried Fruit and Plain Nuts
Non-stuffed olives, vinegar and plain pickles (i.e. those not in sauces).
Plain Rice
All Plain Fresh, Dried, Canned and Frozen Fruit and Vegetables.
Tea, Coffee and Plain Water
Plain dried Pulses.

All other products contained in the following list are suitable for vegetarians and will be labelled on the back or front of pack with one of the logos below:

Nutrition information for vegetarians

If you are a Lacto-ovo vegetarian (that is, you are avoiding all meat, poultry and fish, meat-derived products such as gelatine, but including dairy products and eggs), then following a healthy balanced diet should be relatively easy. If planned well. You should try to include two portions of meat or fish alternatives in order to obtain enough protein, B vitamins and essential fats. Good alternatives include Quorn™, tofu, nuts, beans and lentils. Dairy products and eggs are important sources of the essential amino acids – those amino acids that can't be made by the body and need to be obtained from food. Other sources include, lentils, beans, soya, nuts, seeds and grains, such as wheat, barley, oats, rice and quinoa. However, in order to gain all the essential amino acids from these plant sources you should try and combine plant sources in the same meal. E.g. Beans on toast, rice with dahl.

Omega 3 fats: The best source of these is oily fish. If you are avoiding fish, you should try and include plant sources of these Essential Fatty Acids in your diet everyday, as the body is not able to use the plant source of omega 3 fatty acids as efficiently as those from fish. Vegetarian sources of omega 3 include linseed oil, rapeseed oil, flaxseed, walnut and soya oil, green leafy vegetables, wholegrain cereals and pumpkin seeds.

Iron: If you are excluding red meat from your diet, which is one of the richest sources of iron, then you should try and include eggs (not suitable for vegans or lacto-vegetarians), dark leafy green vegetables such as sprouting broccoli or kale, wholemeal bread, apricots, lentils, pulses and fortified breakfast cereals. However, iron from vegetable sources is not as well absorbed by the body as iron derived from red meat. One way of increasing the efficiency of iron absorption is to eat the food with a good source of vitamin C. For example, have a glass of orange juice with your breakfast cereal.
