Sainsbury's product guidance for VEGANS

About this list

This list contains Sainsbury's own brand products that are suitable for a vegan diet. As there is currently no legal, common definition for the word vegan, Sainsbury's uses the following definition of vegan for application to Sainsbury's own brand foods: **"A vegan avoids anything produced by live animals in addition to any ingredients derived from dead animals."**

A vegan will avoid the following.

- Animal Flesh, including meat, fish, poultry and shellfish.
- Stock made from animal flesh, as above, or from bones (in bouillons, stocks, soups and sauces).
- Animal Fats, including lard, suet and dripping (as an ingredient, for frying, greasing pans etc)
- Milk and milk products e.g. cream, butter.
- Milk derivatives e.g. lactose, lactates, caseinates.
- Cheese and whey powder, regardless of the rennet source.
- Honey and all other bee products (e.g. royal jelly, propolis, bees wax)
- Wines, wine vinegar, beers, ciders clarified using caseinates or egg albumen.
- Lanolin, the precursor of vitamin D

Our suppliers and product technologists have ensured that all products contained in this list do not contain any ingredients that are, or are made from, ingredients derived from animals. The risk of these products being contaminated with animal products at any stage of the supply chain or production process has also been effectively managed.

July 2010

Using the list

This list **does not** include products from the **In Store Bakery**, the **service deli**, the **hot food counters**, **fresh meat** and **fresh fish counters**, Sainsbury's **café** or the **self-service salad bar**. This is due to the potential risk of cross contamination caused by the open food handling.

Within the list, the products are divided by categories e.g. Fresh meal solutions, Dairy, Biscuits etc.

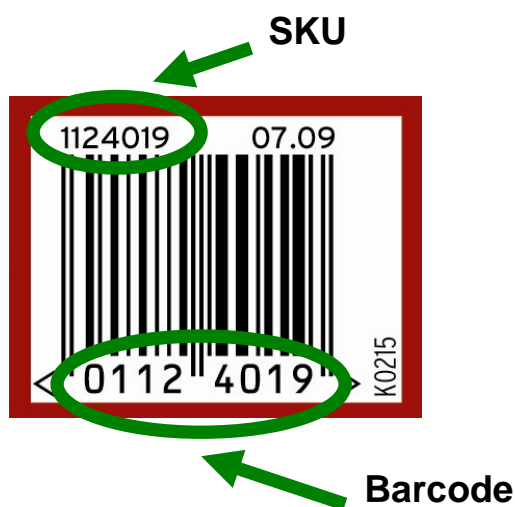

These categories are then divided into sub-categories. So in **Fresh meal solutions** you will find Classic meals, Inspired to Cook, Fresh Italian meals, Fresh Indian meals etc. Following each sub-category there is a four digit number in brackets, e.g. Fresh Italian meals (0015). This is the department code that is unique to the sub-category, this code may help the Sainsbury's colleague in store find the product for you.

The *first column* of the list contains some numbers, used internally by Sainsbury's, called **SKUs**. Each product has a unique SKU number and this may help the Sainsbury's colleague in store or on the customer service desk help you identify the product you are looking for.

The *second column* contains the **barcode** that appears on pack.

The *third column* is the product description. This is the name of the product that appears on the front of pack and it also includes the weight of the product.

How to identify the exact product from the list, when you're doing your shopping:

Sainsbury's sub-brands and abbreviations used in the list:

basics. This is a wide range of Sainsbury's quality food and non-food products at surprisingly low prices, helping budget conscious shoppers lower the cost of their weekly shop. Over 200 of our basics products cost 50p or less. The basics range conforms to our high standards of quality, health and integrity which is why basics foods are free from hydrogenated fats and artificial flavour enhancers.

Taste the difference (abbreviated in the list to Ttd). This is Sainsbury's premium offering of food & drink, giving customers a wide range of high quality, fantastic tasting products. Our teams take time, care & attention to ensure we source the best ingredients & recipes from around the world, to deliver an outstanding taste experience.

be good to yourself (abbreviated in the list to bgty). This is Sainsbury's healthier option range where we have developed great tasting everyday essential products which are better for you because we have controlled the levels of fat, saturated fat, sugar and salt without compromising on taste. All products will either be less than 3% fat or reduced fat (containing at least 30% less fat than the standard equivalent product).

freefrom. This is Sainsbury's brand of products that have all been specially made without wheat or gluten and most are also made without dairy. Products are suitable for coeliacs and people with a wheat allergy. Most are also suitable for people with milk allergy or lactose intolerance.

Sainsbury's SO Organic. This is Sainsbury's range of products where we have developed an organic alternative to most mainstream products. Products are made without the use of artificial fertilisers and limited use of pesticides. Farming practices aim to encourage wildlife and promote optimum soil health. Meat and animal derived products are from farms working to the highest standards of animal welfare. All products have been certified by an organic certification body such as the Soil Association, all whom conform to the standards laid down by the UK and EU government.

Kids. This is Sainsbury's range for kids, giving healthy choices that mums trust and children enjoy. The range is nutritionally balanced and designed especially for children between 4 and 8 years of age, making it a convenient and tasty way to eat healthily. Every product meets Sainsbury's strict standards on salt, sugar and saturated fat and is taste tested and approved by children.

July 2010

How to read Sainsbury's labels

The following products are considered by Sainsbury's to be obviously suitable for vegans and are therefore excluded from vegan labelling:

Loose and pre-packed fruit, vegetables and salad vegetables
Cooking oils
Plain (unseasoned flours)
Salt, Pepper, Herbs, Spices and Curry Powders
Dried Fruit and Plain Nuts
Non-stuffed olives, vinegar and plain pickles (i.e. those not in sauces).
Plain Rice
All Plain Fresh, Dried, Canned and Frozen Fruit and Vegetables.
Tea, Coffee and Plain Water
Plain dried Pulses.

All other products contained in the following list are suitable for vegans and will be labelled on the back or front of pack with the logo below:

July 2010

Nutrition information for vegans

Excluding cows' milk from the diet can potentially lead to inadequate intake of certain nutrients including some B vitamins and especially calcium. Alternative sources of calcium include fortified soya milk and soya products, fortified cereals and bread, dark green leafy vegetables and pulses. Calcium from some of these sources (eg pulses and cereals) is less well absorbed than from milk and dairy so you may need to take in larger amounts.

Iron: Plant sources of iron include dark leafy green vegetables such as sprouting broccoli or kale, wholemeal bread, apricots, lentils, pulses and fortified breakfast cereals. However, iron from vegetable sources is not as well absorbed by the body as iron derived from red meat. One way of increasing the efficiency of iron absorption is to eat the food with a good source of vitamin C. For example, have a glass of orange juice with your breakfast cereal.

Eggs are a good source of vitamin B12, B2 and vitamin A so check that you include other sources of these vitamins in your diet. The best plant sources of vitamin A include dark green leafy vegetables and orange coloured fruit and vegetables. Alternative sources of vitamin B2 are rice and fortified breakfast cereals. Only animal derived foods (meat/dairy) and fortified breakfast cereals can supply Vitamin B12 so ensure you include plenty of fortified foods such as breakfast cereals or consider using a supplement. For vitamin D you will need to ensure that you get enough sunlight.

Fish and shellfish are good sources of a variety of vitamins and minerals, and oily fish is particularly rich in omega 3 fatty acids. If you are avoiding fish, make sure you eat other sources of omega 3 fatty acids. Plant-based seeds and oils that are good sources of omega 3 fatty acids are linseed, flaxseed, walnut and rapeseed. Try and include these plant sources in your diet everyday.

Dairy products and eggs are important sources of the essential amino acids – those amino acids that can't be made by the body and need to be obtained from food. Other sources include, lentils, beans, soya, nuts, seeds and grains, such as wheat, barley, oats, rice and quinoa. However, in order to order to gain all the essential amino acids from these plant sources you should try and combine plant sources in the same meal. E.g. Beans on toast, rice with dahl.

Sainsbury's own brand products for Vegans
